

Sustainable Product Portfolio 2025

IRPC Public Company Limited

Sustainable Product Portfolio 2025

As of 2025, IRPC offers 4 key categories of environmentally friendly and sustainability-enhanced products, primarily driven through its specialty and eco-friendly polymer innovations. The Company identifies environmentally friendly or sustainability-enhanced products based on defined environmental and safety criteria applied throughout the product development process, aligned with EU Taxonomy's environmental objectives.

Environmental Objective	Product Type	Example IRPC Products	Contribution	Revenues (THB)			
				2022	2023	2024	2025
Transition to a Circular Economy	Bio-composite and recyclable polymer products	Green ABS	Reduce virgin plastic use and synthesis rubber, enable recyclability, support circular material flows	374,078	587,639	421,110	98,335
Transition to a Circular Economy	r-PET recyclable polymer products	3D filament	Reduce virgin plastic use, enable recyclability, support circular material flows	-	148,577	70,106	617,306
Transition to a Circular Economy	Recyclable polymer products	Furniture	Enable recyclability, support circular material flows	-	54,000	367,400	350,000
Transition to a Circular Economy	Recyclable polymer products	Fender	Reduce virgin plastic use, enable recyclability, support circular material flows	-	-	-	2,325,000
Total Sustainable Revenues (Baht)				374,078	790,216	858,615	3,390,641
Percentage of Sustainable Revenues (%)				0.00011	0.00025	0.00027	0.00121
